

# **SAFETY DATA SHEET**

**MitoSpy Reagents** 

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier        |                    |
|-------------------------------|--------------------|
| Product name                  | : MitoSpy Reagents |
| Product code                  | : Not available.   |
| Product type                  | : Powder.          |
| Other means of identification | : Not available.   |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Product use         | : Research.                |
|---------------------|----------------------------|
| Area of application | : Industrial applications. |

#### 1.3 Details of the supplier of the safety data sheet

BioLegend Inc. 9727 Pacific Heights Blvd. San Diego, CA 92121 – USA Tel: +1-858-455-9588

e-mail address of person : cs@biolegend.com responsible for this SDS

#### **Only representative**

BioLegend Inc. 4B Highgate Business Centre 33 Greenwood Place London, NW5 1LB - UK Tel: +44 (0) 20 3475 3880 http://www.biolegend.com/uk

#### 1.4 Emergency telephone number

#### National advisory body/Poison Centre

| Telephone number | <ul> <li>Call 111 if you urgently need medical help or advice but it's not a life-threatening situation (NHS 111 service).</li> <li>NHS 111 is available 24 hours a day, 365 days a year</li> </ul> |  |
|------------------|---|--|
| <u>Supplier</u>  |   |  |
| Telephone number | : +44 (0) 20 3475 3880 (9:00AM - 5:00PM GMT, M-F)   |  |

MitoSpy Reagents

# **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

#### Product definition : Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

| Ingredients of unknown<br>toxicity    | : 100 percent of the mixture consists of component(s) of unknown toxicity      |
|---------------------------------------|--|
| Ingredients of unknown<br>ecotoxicity | : Contains 100 % of components with unknown hazards to the aquatic environment |

See Section 11 for more detailed information on health effects and symptoms.

| 2.2 Label elements  |    |  |
|---|----|--|
| Signal word   | :  | No signal word.                                    |
| Hazard statements   | :  | No known significant effects or critical hazards.  |
| Precautionary statements  |    |  |
| Prevention  | :  | Not applicable.                                    |
| Response  | :  | Not applicable.                                    |
| Storage   | :  | Not applicable.                                    |
| Disposal  | :  | Not applicable.                                    |
| Supplemental label<br>elements  | :  | Not applicable.                                    |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :  | Not applicable.                                    |
| Special packaging requirem  | en | <u>ts</u>  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | :  | Not applicable.                                    |
| Tactile warning of danger   | :  | Not applicable.                                    |
| 2.3 Other hazards   |    |  |
| Other hazards which do not result in classification   | :  | May form explosible dust-air mixture if dispersed. |

MitoSpy Reagents

# **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

: Mixture

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.   |
|----------------------------|---|
| Inhalation                 | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>Get medical attention if symptoms occur. In case of inhalation of decomposition<br>products in a fire, symptoms may be delayed. The exposed person may need to be<br>kept under medical surveillance for 48 hours.                                  |
| Skin contact               | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>  |
| Ingestion                  | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training.  |

#### 4.2 Most important symptoms and effects, both acute and delayed

#### Over-exposure signs/symptoms

| Eye contact  | : Adverse symptoms may include the following:<br>irritation<br>redness                    |
|--------------|---|
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing |
| Skin contact | : No specific data.   |
| Ingestion    | : No specific data.   |

#### 4.3 Indication of any immediate medical attention and special treatment needed

**Notes to physician** : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Specific treatments : No specific treatment.

MitoSpy Reagents

# **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                           |     |   |
|---|-----|---|
| Suitable extinguishing media                      | :   | In case of fire, use water spray (fog), foam, dry chemical or $CO_2$ .  |
| Unsuitable extinguishing media                    | :   | Do not use water jet.   |
| 5.2 Special hazards arising f                     | rom | the substance or mixture  |
| Hazards from the substance or mixture             | :   | May form explosible dust-air mixture if dispersed.  |
| Hazardous thermal decomposition products          | :   | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>halogenated compounds  |
| 5.3 Advice for firefighters                       |     |   |
| Special protective actions for fire-fighters      | :   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |
| Special protective<br>equipment for fire-fighters | :   | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

## **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing dust. Put on<br>appropriate personal protective equipment. |
|--------------------------------|---|---|
| For emergency responders       | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| 6.2 Environmental precautions  | : | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |

#### 6.3 Methods and material for containment and cleaning up

| Date of issue/Date of revision | : 22/12/2016 | Date of previous issue | : No previous validation | Version | :1 | 4/13 |
|--------------------------------|--------------|------------------------|--------------------------|---------|----|------|
|--------------------------------|--------------|------------------------|--------------------------|---------|----|------|

## **SECTION 6: Accidental release measures**

| Small spill                     | : Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.  |
|---------------------------------|--|
| Large spill                     | : Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Dispose of via a licensed waste disposal contractor. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

# 7.3 Specific end use(s)Recommendations: Not available.Industrial sector specific: Not available.solutions

# **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### **Occupational exposure limits**

No exposure limit value known.

**Recommended monitoring** If this product contains ingredients with exposure limits, personal, workplace 2 atmosphere or biological monitoring may be required to determine the effectiveness procedures of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available

| 8.2 Exposure controls            |  |
|----------------------------------|--|
| Appropriate engineering controls | : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.     |
| Individual protection measure    | <u>ires</u>  |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. If operating conditions cause high dust concentrations to be produced, use dust goggles. |
| Skin protection                  |  |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.  |
| Date of issue/Date of revision   | : 22/12/2016 Date of previous issue : No previous validation Version : 1 6/13  |

# **SECTION 8: Exposure controls/personal protection**

| Body protection                 | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
|---------------------------------|---|
| Other skin protection           | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels. |

# **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

| Appearance                                      |  |
|---|--|
| Physical state                                  | : Solid. [Powder.]   |
| Colour  | : Not available.   |
| Odour   | : None.  |
| Odour threshold                                 | : None.  |
| рН  | : Not available.   |
| Melting point/freezing point                    | : Not available.   |
| Initial boiling point and boiling range         | : Not applicable.  |
| Flash point                                     | : Not available.   |
| Evaporation rate                                | : Not applicable.  |
| Flammability (solid, gas)                       | : Not available.   |
| Upper/lower flammability or<br>explosive limits | : Not available.   |
| Vapour pressure                                 | : Not applicable.  |
| Vapour density                                  | : Not applicable.  |
| Relative density                                | : Not applicable.  |
| Solubility(ies)                                 | : DMF, DMSO, Methanol, Chloroform.                                   |
| Partition coefficient: n-octanol/<br>water      | : Not available.   |
| Auto-ignition temperature                       | : Not available.   |
| Decomposition temperature                       | : Not available.   |
| Viscosity                                       | : Not available.   |
| Explosive properties                            | : Not available.   |
| Oxidising properties                            | : Not available.   |
| Date of issue/Date of revision                  | : 22/12/2016 Date of previous issue : No previous validation Version |

MitoSpy Reagents

# **SECTION 9: Physical and chemical properties**

#### 9.2 Other information

| Solubility in water                   | : Not available.             |
|---------------------------------------|------------------------------|
| Physical/chemical properties comments | : No additional information. |

| SECTION 10: Stability and reactivity       |   |  |  |
|--|---|--|--|
| 10.1 Reactivity                            | : | No specific test data related to reactivity available for this product or its ingredients.   |  |
| 10.2 Chemical stability                    | : | The product is stable.   |  |
| 10.3 Possibility of<br>hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.<br>Under normal conditions of storage and use, hazardous polymerisation will not occur.  |  |
| 10.4 Conditions to avoid                   | : | Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Prevent dust accumulation. |  |
| 10.5 Incompatible materials                | : | Reactive or incompatible with the following materials: oxidizing materials, reducing materials and moisture.   |  |
| 10.6 Hazardous<br>decomposition products   | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced.   |  |

# **SECTION 11: Toxicological information**

| 11.1 Information on toxicological effects |                  |  |  |  |
|---|------------------|--|--|--|
| Acute toxicity                            |                  |  |  |  |
| <b>Conclusion/Summary</b>                 | : Not available. |  |  |  |

#### Notice to reader

To the best of our knowledge, the information contained herein is accurate. However, neither the above-named supplier, nor any of its subsidiaries, assumes any liability whatsoever for the accuracy or completeness of the information contained herein.

Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist.

# **SAFETY DATA SHEET**

DMSO

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier        |   |
|-------------------------------|---|
| Product name                  | : DMSO  |
| EC number                     | : 200-664-3   |
| CAS number                    | : 67-68-5   |
| Product code                  | : 370704  |
| Product type                  | : Liquid.   |
| Other means of identification | <ul> <li>Methane, 1,1'-sulfinylbis-; Methane, sulfinylbis-; Dimethyl sulphoxide; Methyl<br/>sulfoxide; Methylsulfinylmethane; Sulfinyl bis(methane); Methyl sulphoxide; DMSO</li> </ul> |
| Chemical formula              | : C2-H6-O-S   |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Product use         | : Research.                |
|---------------------|----------------------------|
| Area of application | : Industrial applications. |

#### 1.3 Details of the supplier of the safety data sheet

BioLegend Inc. 9727 Pacific Heights Blvd. San Diego, CA 92121 – USA Tel: +1-858-455-9588

e-mail address of person : cs@biolegend.com responsible for this SDS

#### **Only representative**

BioLegend Inc. 4B Highgate Business Centre 33 Greenwood Place London, NW5 1LB - UK Tel: +44 (0) 20 3475 3880 http://www.biolegend.com/uk

#### **1.4 Emergency telephone number**

#### National advisory body/Poison Centre

| Telephone number                    | <ul> <li>Call 111 if you urgently need medical help or advice but it's not a life-threatening<br/>situation (NHS 111 service).</li> <li>NHS 111 is available 24 hours a day, 365 days a year</li> </ul> |
|-------------------------------------|---|
| <u>Supplier</u><br>Telephone number | : +44 (0) 20 3475 3880 (9:00AM - 5:00PM GMT, M-F)   |

# SECTION 2: Hazards identification 2.1 Classification of the substance or mixture

#### Product definition : Mono-constituent substance

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Not classified.

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 11 for more detailed information on health effects and symptoms.

| 2.2 Label elements  |   |
|---|---|
| Signal word   | : No signal word.                                   |
| Hazard statements   | : No known significant effects or critical hazards. |
| Precautionary statements  |   |
| Prevention  | : Not applicable.                                   |
| Response  | : Not applicable.                                   |
| Storage   | : Not applicable.                                   |
| Disposal  | : Not applicable.                                   |
| Hazardous ingredients   | : dimethyl sulfoxide                                |
| Supplemental label elements   | : Not applicable.                                   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.                                   |
| Special packaging requirem  | ents  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.                                   |
| Tactile warning of danger   | : Not applicable.                                   |
| 2.3 Other hazards   |   |
| Substance meets the<br>criteria for PBT according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | : No.<br>P: Not available. B: No. T: Yes.           |
| Substance meets the<br>criteria for vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII   | : No.<br>vP: Not available. vB: No.                 |
| Other hazards which do not result in classification   | : None known.                                       |

2/14

# **SECTION 3: Composition/information on ingredients**

#### 3.1 Substances

: Mono-constituent substance

| Product/ingredient name | Identifiers                   | %   | Regulation (EC) No.<br>1272/2008 [CLP] | Туре |
|-------------------------|-------------------------------|-----|--|------|
| dimethyl sulfoxide      | EC: 200-664-3<br>CAS: 67-68-5 | 100 | Not classified.                        | [A]  |

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

Туре

[A] Constituent

[B] Impurity

[C] Stabilising additive

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.   |
|----------------------------|---|
| Inhalation                 | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>Get medical attention if symptoms occur.  |
| Skin contact               | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.  |
| Ingestion                  | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training.  |

#### **4.2 Most important symptoms and effects, both acute and delayed**

Over-exposure signs/symptoms

| Eye contact  | : No specific data. |
|--------------|---------------------|
| Inhalation   | : No specific data. |
| Skin contact | : No specific data. |
| Ingestion    | : No specific data. |

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
|---------------------|---|
| Specific treatments | : No specific treatment.  |

DMSO

# **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                           |     |   |
|---|-----|---|
| Suitable extinguishing media                      | :   | Use dry chemical, $CO_2$ , water spray (fog) or foam.   |
| Unsuitable extinguishing media                    | :   | Do not use water jet.   |
| 5.2 Special hazards arising f                     | rom | the substance or mixture  |
| Hazards from the substance or mixture             | :   | In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products          | :   | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides   |
| 5.3 Advice for firefighters                       |     |   |
| Special protective actions for fire-fighters      | :   | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective<br>equipment for fire-fighters | :   | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | tective equipment and emergency procedures   |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Put on appropriate personal<br>protective equipment.                       |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and material for o | containment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop<br>up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry<br>material and place in an appropriate waste disposal container. Dispose of via a<br>licensed waste disposal contractor. |

## **SECTION 6: Accidental release measures**

| Large spill                     | : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. |
|---------------------------------|--|
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

**Protective measures** : Put on appropriate personal protective equipment (see Section 8).

Advice on general occupational hygiene : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental containintion.

#### 7.3 Specific end use(s)

Recommendations: Not available.Industrial sector specific: Not available.solutions: Not available.

## **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

**Occupational exposure limits** 

No exposure limit value known.

**Recommended monitoring procedures** : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482

DMSO

## **SECTION 8: Exposure controls/personal protection**

(Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available

#### 8.2 Exposure controls

| Appropriate engineering controls | :    | Good general ventilation should be sufficient to control worker exposure to airborne contaminants.  |
|----------------------------------|------|---|
| Individual protection meas       | ures |   |
| Hygiene measures                 | :    | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location. |
| Eye/face protection              | :    | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection                  |      |   |
| Hand protection                  | :    | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary.   |
| Body protection                  | :    | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Other skin protection            | :    | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection           | :    | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
| Environmental exposure controls  | :    | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |

# **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

| Ap | pea | ran | се |  |
|----|-----|-----|----|--|

| Appearance                                      |  |

# SECTION 11: Toxicological information Carcinogenicity Conclusion/Summary : Not available. Reproductive toxicity Conclusion/Summary : Not available. Conclusion/Summary : Not available.

**Teratogenicity** 

Conclusion/Summary : Not available.

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

**Aspiration hazard** 

Not available.

## Information on likely routes : Not available. of exposure Potential acute health effects

| Eye contact  | : No known significant effects or critical hazards. |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion    | : No known significant effects or critical hazards. |

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : No specific data. |
|--------------|---------------------|
| Inhalation   | : No specific data. |
| Skin contact | : No specific data. |
| Ingestion    | : No specific data. |

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

| <u>Short term exposure</u>     |              |                                     |                          |         |    |      |
|--------------------------------|--------------|-------------------------------------|--------------------------|---------|----|------|
| Potential immediate<br>effects | :            | Not available.                      |                          |         |    |      |
| Potential delayed effects      | :            | Not available.                      |                          |         |    |      |
| Long term exposure             |              |                                     |                          |         |    |      |

# **SECTION 11: Toxicological information**

| General                      | : No known significant effects or critical hazards. |
|------------------------------|---|
| Carcinogenicity              | : No known significant effects or critical hazards. |
| Mutagenicity                 | : No known significant effects or critical hazards. |
| Teratogenicity               | : No known significant effects or critical hazards. |
| <b>Developmental effects</b> | : No known significant effects or critical hazards. |
| Fertility effects            | : No known significant effects or critical hazards. |
|                              |   |

#### Other information

: Not available.

# **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name | Result   | Species  | Exposure                         |
|-------------------------|--|--|----------------------------------|
| dimethyl sulfoxide      | Acute LC50 25000 ppm Fresh water   | Daphnia - Daphnia magna -<br>Neonate   | 48 hours                         |
|                         | Acute LC50 34000000 µg/l Fresh water<br>Chronic NOEC 100 ul/L Marine water<br>Chronic NOEC 6 ppb Fresh water | Fish - Pimephales promelas<br>Algae - Ulva lactuca<br>Fish - Poecilia reticulata - Adult | 96 hours<br>72 hours<br>16 weeks |
| Conclusion/Summary      | : Not available.   | *  | <u>.</u>                         |

#### 12.2 Persistence and degradability

| Product/ingredient name | Test  | Result     |            | Dose |         | Inoculum   |
|-------------------------|---|------------|------------|------|---------|------------|
| dimethyl sulfoxide      | 301C Ready<br>Biodegradability -<br>Modified MITI<br>Test (I) | 3.1 % - 14 | days       | -    |         | -          |
| Conclusion/Summary      | : Not available.  |            |            |      |         |            |
| Product/ingredient name | Aquatic half-life   |            | Photolysis |      | Biodeg  | radability |
| dimethyl sulfoxide      | -   |            | -          |      | Not rea | dily       |

#### **12.3 Bioaccumulative potential**

| F | Product/ingredient name | LogPow | BCF  | Potential |
|---|-------------------------|--------|------|-----------|
| d | limethyl sulfoxide      | -1.35  | 3.16 | low       |

#### **12.4 Mobility in soil**

| Soil/water partition coefficient (Koc) | : Not available. |
|--|------------------|
| Mobility                               | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

| Date of issue/Date of revision | : 22/12/2016 | Date of previous issue | : No previous validation | Version | : 1 | 10/14 |
|--------------------------------|--------------|------------------------|--------------------------|---------|-----|-------|
|--------------------------------|--------------|------------------------|--------------------------|---------|-----|-------|

DMSO

# SECTION 12: Ecological information

PBT vPvB : No. : No.

**12.6 Other adverse effects** : No known significant effects or critical hazards.

# **SECTION 13: Disposal considerations**

| 13.1 Waste treatment method | S   |
|-----------------------------|---|
| Product                     |   |
| Methods of disposal         | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. |
| Hazardous waste             | : Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.   |
| Packaging                   |   |
| Methods of disposal         | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Special precautions         | : This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.   |
