

Purified anti-S100B Antibody

SeqIF™ (sequential immunofluorescence) staining on COMET™ of Purified anti-S100B (clone 11C12E12, yellow) on formalin-fixed paraffin-embedded human pancreatic carcinoma at 1.25 µg/mL. Alexa Fluor™ Plus 647 Goat anti-Mouse IgG antibody (Lunaphore, Cat. No. DR647MS) was used as a secondary antibody. Nuclei were counterstained with DAPI (blue). Tissue underwent an all-in-one dewaxing and antigen retrieval preprocessing.
