

**Purified anti-human CD66b Antibody**

SeqIF™ (sequential immunofluorescence) staining on COMET™ of Purified anti-CD66b (clone 6/40c, yellow) on formalin-fixed paraffin-embedded human tonsil tissue at 5 µg/mL. Alexa Fluor™ Plus 647 Goat anti-Mouse IgG antibody (Lunaphore, Cat. No. DR647MS) was used as a secondary antibody. Nuclei were counterstained with DAPI (blue). Tissue underwent an all-in-one dewaxing and antigen retrieval preprocessing.
