

Purified anti-human CD138 (Syndecan-1) Antibody

SeqIF™ (sequential immunofluorescence) staining on COMET™ of Purified anti-CD138 (Syndecan-1) (clone MI15, yellow) on formalin-fixed paraffin-embedded human skin tissue. Alexa Fluor™ Plus 647 Goat anti-Mouse IgG antibody (Lunaphore, Cat. No. DR647MS) was used as a secondary antibody. Nuclei were counterstained with DAPI (blue). Tissue underwent an all-in-one dewaxing and antigen retrieval preprocessing.
