

Purified anti-TGF- β 1 Antibody

IHC staining of anti-TGF- β 1 antibody (clone O92B5) on formalin-fixed paraffin-embedded human skin tissue. Following antigen retrieval using sodium citrate, the tissue was incubated with the primary antibody for two hours at room temperature at 5 μ g/ml. BioLegend's Ultra-Streptavidin (USA) HRP Detection Kit was used for detection followed by counterstaining with hematoxylin.
