

Purified anti-Myelin Basic Protein Antibody

IHC staining of clone SMI 94 on formalin-fixed paraffin-embedded human cerebellum tissue at 1 µg/ml. Following antigen retrieval with Retrieve-All Antigen Unmasking System 3 (Acidic, 10X), the tissue was incubated with the primary antibody for 24 hours at 4°C. BioLegend's Ultra Streptavidin (USA) HRP Detection Kit (Multi-Species, DAB) was used for detection with DAB chromogen.
